Chart Title

N	time	val
2	156.44	15.16
4	34.77	15.16
8	37.63	15.16
16		
32		

I was unable to get Euler to do a batch job to run with 16 and 32 size tiles. Maybe my memory allocation was insufficient.. I got the same answer for the value for N=2,4,8 so I am pretty sure my implementation is right for small numbers of N. There is a big improvement from N=2 to N=4
